Paper Types/Groups
Stocked Papers

Group A

Canson Infinity PhotoLustre (310gsm)
A classic semi-gloss photo paper great for day to day digital printing.

Group B

Canson Infinity ARCHES® 88 (310gsm)
This 100% cotton paper has a papers unique inkjet receiving layer produces prints with superb colour rendition, deep blacks and natural whites which offers a superb tonal range, excellent highlights and mid-tones.
It has an ultra-smooth feel and is free of optical brighteners.

Canson Infinity Rag Photographique (310gsm)
Rag Photographique is a 100% cotton museum grade white Fine Art and photo paper.
The exceptional smooth white tone is achieved during manufacturing by introducing natural minerals to the process.
It offers a unique extra smooth surface with a sensual feel.

Canson Infinity Baryta Photographique II (310gsm)
Baryta Photographique II has a true 100% barium sulphate layer (baryta) which offers exceptional contrast and detail as well as a wide colour gamut. The product has an extremely high D-Max (black point) to produce black and white images with depth and clarity and colour images with vibrancy and intensity. This semi-gloss paper is not one to be looked over. It is incredible!

Canson Infinity Baryta Photographique II Matt (310gsm)
This new paper has an extremely smooth surface with a totally matt finish which, due to the lack of grain interference, accentuates the detail in the printed image. The matt surface also has no light reflection from any viewing angle.

Canson Infinity PrintMaKing Rag (310gsm)
This 100% cotton printing paper is manufactured on a cylinder mold, has a unique pure white without optical brighteners and an incomparable, fine and silky touch. This exceptional paper is ideal for fine art prints and photographs and gives them a very prestigious aura.

Canson Infinity Edition Etching Rag (310gsm)
A lightly textured 100% cotton rag, very similar to the original etching and printmaking papers.
This paper has one of the purest white tones available without any optical brighteners, and offers superb sharpness which almost makes it seem as if your prints are coming to life!

Ilford Metallic Gloss (260gsm)
This stunning metallic paper offers photographers the ability to print images with a true
'wow' factor. The iridium finish gives every image a three-dimensional look.

Paper Types/Groups
Limited Papers

Group A

Canson Infinity PhotoSatin Premium RC (270gsm)
The surface aesthetic of PhotoSatin Premium RC is reminiscent of the original photochemical papers traditionally associated with the Baryta market. This paper gives softened reflections on photographs.
It is a great choice for black & white and colour photography.

Canson Infinity PhotoGloss Premium RC (270gsm)
This paper offers an exceptional D-Max as well as a wide colour gamut and is ideal to produce stunning high gloss colour photographs.

Group B

Breathing Color Elegance Velvet Platinum (310gsm)
Elegance Velvet is a proprietary mould-made, heavily textured fine art paper that is strong and dimensionally stable. It has a high white point, and best-in-class image quality that far exceeds the limitations of virtually every paper of its kind.

Hahnemühle Photo Rag Baryta (315gsm)
This is a pure cotton paper with an inkjet coating that has been perfectly optimised for the needs of Fine Art applications. The exquisite surface texture gives the paper a delicate feel whilest lending it an artistic note.

Hahnemühle German Etching (310gsm)
This is a traditional mould-made copperplate printing paper, complete with an inkjet coating designed especially for Fine Art applications. The white art paper made from 100% alpha cellulose is characterised by its extraordinary velvety tactile feel and its fine, clearly defined felt structure.
The unique surface texture adds a very special touch to images, showcasing them in all their splendour with impressive three-dimensional effect and depth.

Ilford Gold Fibre Gloss (310gsm)
This glossy baryta-like paper has no optical brighteners, and a seamless transition between contrast, shadow detail and highlight areas. It is a great choice for both colour and black and white images.

Please Note:
Papers listed on this page are limited in stock numbers and may need to be ordered in.
If you are aware of what paper you would like to use, please contact me in advance to make sure your selected paper is in stock. A restocking fee or minimum order may apply if paper is not in stock.

Processsing Time

- Retouching and Restoration orders take between 3 and 15 business days to complete, depending on the complexity of the editing your images require.

Refunds

- We cannot offer returns or refunds for this service.

Printer Profiling

About

Part of the printing process is making sure that the colours on the paper you use are accurate when compared to what you see on screen, and by default, your printer won't print accurate colours Our printer profiling service, along with a calibrated monitor, makes certain of accurate colour reproduction from screen to print.

How It Works

- First, you print a profile target onto your paper of choice, which will be prodvied to you via email.
- You then bring the prints in, and we scan them with our i1Photo Pro 3 Plus Spectrophotometer.
- The X-Rite software then creates an ICC profile, which tells the printer what adjustments it needs to make to print colours accurately. We send this profile to you via email.
- You select this custom made ICC profile each time you wish to print on that particular paper.

Pricing

Amount Of Papers

01 - $75	02 - $150	03 - $205	04 - $260	05 - $305
06 - $360	07 - $400	08 - $440	09 - $475	10 - $500

Ordering

- Please click the "Order" button on the Printer Profiling section of the website.
- Select how many papers you would like profiled. The more you profile, the more you save!
- We will then email you with your proper invoice, the colour target, information on how to print it and the location of our studio to deliver the target for us to profile your paper.
- Please Note: No refunds or replacements are available for this service
